Page numbers are usually for GURPS Magic. The B prefix means Bio-Tech, T means Technomancer.

BG is the Berkley Grimoire (spells from the GURPS 3<sup>rd</sup> Edition Basic Set). All BG spells are also in 5-WHAT and 7-WHAT.

FSF is the work “Free Spell Formulae”, a recently popular alternative to the Berkley Grimoire (spells from the GURPS 4<sup>th</sup> Edition Basic Set). All FSF spells are also in 7-WHAT.

WHAT is the Working Handbook of Applied Thaumaturgy. 5-WHAT means it was in the 1996 5<sup>th</sup> Edition (generally available in the original Technomancer setting), 7-WHAT means it is in the 2004 7<sup>th</sup> Edition (added by my judgment to the setting by the date in Infinite Worlds). All 5-WHAT spells are in 7-WHAT.

“Classified” indicates a spell that governments keep out of the open literature, and usually requires Security Clearance to learn.

“Trade Secret” indicates a spell that is in use commercially, but is not published. It requires employment by the owning company to learn, and the spread is regulated by trade secret law.

“Not Invented” means nobody’s invented it, or the inventor(s), if any, have kept it completely to themselves.
